"One voice - Many votes"

NOVEMBER 2022

VOLUME 21
EDITION IX

"LIVING IN LIBERTY: HOW TO KEEP GOING IN THE FACE OF TYRANNY" MEET PEGGY HALL

Join us on November 8, 2022, (Lunch Meeting) to hear from Peggy Hall, Founder of The Healthy American.

Peggy Hall is at the helm of Truth and Freedom, giving you the tools, tips, resources and remedies to fight tyranny. She is the former Director of Teacher Education at UC Irvine Extension and has degrees in Political Science and International Policy. Peggy broadcasts daily on YouTube and has millions of views with her "Peggy to the

Rescue" series that gives you strategies and solutions to stand up for your rights.

"I am probably a lot like you. A curious person who wants to dig deeper to understand what is happening to my country, my life and my freedom. I want to live life healthy and free. My mission is to educate, inform and inspire others to do the same."

Peggy Hall is a national leader in the freedom movement and is dedicated to "breathing life back into liberty". As an educator, she has years of experience as a health educator and community activist. Peggy's goal is to

empower patriots across the country to take action to make "positive waves of change" as we fight back against a growing tidal wave of tyranny.

CRWF Annual Holiday Boutique

Get into the holiday season and gift giving at the November luncheon. Bid on silent auction gift baskets while they last! There will also be festive decorations from Designs by Danielle for your Holiday décor and cozy hand crocheted items, at reasonable prices. Don't miss

out on Hazel's Bagz and Apparel with unique ensembles to spice up your holiday wardrobe, attire, purses, and faux fur. Accessorize party outfits with dazzling pieces from Amy Garcia's Jewelry that are truly unique! There will be a variety of items such

as tunics, slippers, umbrellas, and more by Pegboard Highway. Have fun buying gifts for your family, friends, and yourself. Support CRWF by shopping our vendors!

GET TICKETS NOW —NOVEMBER 08, 2022 at 11:00 A.M.

PRESIDENT PAMELA FAULKNER 2022-2023

ACTION ALERT—PRAY FOR
FLORIDA

Father, we acknowledge You as Lord over All! You rule the seas, the winds, and the rain.

In your mercy, we humbly ask that you send Ian back into the sea to weaken quickly. We pray for the safety and protection of all who are in the path of Ian. We pray this storm will not bring the floods and destruction they are predicting.

Calm all those who are preparing for landfall. May their peace be found in you, as you strengthen them during this time. Bless and keep all who are there to protect and restore the people and properties of Florida. WE pray that every provision will be available to those in need.

Father once again, we thank You that You are the Lord over All. Have mercy on all in Ian's path. In Jesus name we pray, Amen.

Have mercy on me, God, have mercy, for you in my soul is taking refuge. In the shadow of your wings I take refuge, till the storms of destruction pass by.
(Psalm 57:2)

Sharon Stuthard
NFRW Faith Coalition Chair

Pamela Faulkner
CAMARILLO RWF PRESIDENT

Gold Coast Veterans Foundation – serving those who served us!

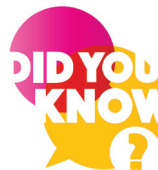

This foundation is passionate in their pursuit to help those who served their country and who now find themselves without support. Their Mission is to reduce or eliminate suffering, lowered quality of life, re-integration difficulties and negative lifetime outcomes of American military veterans.

They are in the process of building Veterans' Village, a holistic approach to veteran homelessness; equal parts healing and housing. They are doing all of this without asking for government support: they need us!

Joanna Wullschleger, along with the Camarillo RWF, are partnering in a small way with this extremely worthwhile organization. Brochures will be available at the luncheon.

History of Thanksgiving

Joanna Wullschleger

1. *The first Thanksgiving took place in 1621.*
2. *Every Thanksgiving, the current*

President pardons a turkey.

3. *Americans eat over 280 million turkeys every Thanksgiving.*
4. *Cranberries are native to North America.*
5. *This is the biggest travel day of the year.*
6. *This year Thanksgiving is on the 24th of November.*

Have a Wonderful Holiday!!

NEW BILLS, BUDGET TRAILER BILLS AND COSTLY LEGISLATION WILL CONTINUE INTO 2023

SB 905 - CARBON CAPTURE, REMOVAL, UTILIZATION, AND STORAGE PROGRAM

This bill would require the State Resources Board to establish a Carbon Capture, Removal, Utilization, and Storage Program to evaluate the efficacy, safety, and viability of carbon capture, utilization or storage technologies and carbon dioxide removal technologies and facilitate the capture and sequestration of carbon dioxide from those technologies, where appropriate. This bill would require the state board, in consultation with relevant state and local agencies by 11/2025 to adopt regulations for a unified permit application for the construction and operation of carbon dioxide capture, removal or sequestration projects to expedite the issuance of permits or other authorization for the construction and operation of those projects. This bill would require relevant state agencies to use the unified permit application when issuing permits or other authorizations for a carbon dioxide capture removal or sequestration project. This bill has many more provisions that will make it exceedingly difficult for permits to be issued because of the multiple agencies that need to sign off and agree to conditions of approval.

AB 1279- THE CALIFORNIA CLIMATE CRISIS ACT

This bill would declare the policy of the state both to achieve net zero greenhouse gas emissions as soon as possible, but no later than 2045, and achieve and maintain net reduced to at least 8% below the 1990 levels. The bill would require the State Air Resources Board to work with relevant state agencies to ensure that updates to the scoping plan identify and recommend measures to achieve these policy goals and to identify and implement a variety of policies and strategies that enable carbon dioxide removal solutions and carbon capture, utilization, and storage technologies in California. This bill would require the state board to submit an annual report to the Legislature. If anyone wants to know why appliances cost more and fail faster in California, this bill says it all.

AB 351- REDUCTION OF HUMAN REMAINS AND DISPOSITION OF REDUCED HUMAN REMAINS

This bill, commencing January 1, 2027, would require the Cemetery and Funeral Bureau within the Department of Consumer Affairs to license and regulate reduction facilities and would enact requirements applicable to reduction facilities substantially similar to those applicable to crematoria and hydrolysis facilities, and would enact provisions relating to the disposition of human remains and creating new crimes, this bill would impose a state-mandated local program. This bill would require the State Department of Public Health to adopt rules and regulations prescribing the standards for reduction chamber to preserve the public health and safety and to ensure the destruction of pathogenic microorganisms. This bill, commencing 1/1/2027, would require reduction chamber

manufacturers to apply to the State Department of Public Health for approval of reduction chambers for use in the State and to charge a reduction chamber manufacturer regulatory fee for the evaluation of a reduction chamber as specified. This bill prohibits the use of a non-approved reduction chamber by a reduction facility of its employees. *Bottom-line, this bill is a new method of dealing with human remains. They can now be put back into the soil as a soil amendment. Signed by Governor Newsom.*

For additional information of each Bill/Proposition go to <https://leginfo.legislature.ca.gov> and enter the Bill Number or keywords where designated.

Submitted by: Pam Lindeman, CRWF Legislation/Activism Chair 10/2/22

Happy Autumn to our Members.
We are kicking off our membership drive
for new members initiated by the California
Federated Republican Women.

We invite you to be part of this important
endeavor by inviting your friends and family to
join our club
for the fun and educational events planned for
this next year.

Look forward to seeing you at the next meeting
with your new applicants.

Best regards,
Your membership committee
Linda Bednarski
Cindy Birch
Chris Friedgen

*CRWF Members Vonnay Brook and Joanna Wullschleger with

*CRWF member and campaign manager Pamela Krausz with
candidate Cole Brocato*

*Cole Brocato, Assembly District 38 and CAGOP
Chairperson Jessica Patterson*

*Cole Brocato for Assembly District 38 and Senator Shannon
Grove*

Registrar of Voters Tour Notes

By Nicolas Bednarski

Several members of staff met with us in the entry area and introduced the Apex machine room, explaining it read and displayed the ballot envelope signatures which were also verified by human staff; the rejection rate of signatures is $< 1/2\%$ and the thresholds for signature verification have not changed, remaining as strict as in the past. Those signatures rejected by human review result in a letter to the voter to confirm the vote and their signature on that ballot; almost all voters confirm thus the low rejection rate. The sealed ballot envelopes are then taken down a hallway under camera coverage (the entire office is covered by ceiling cameras) to the Apex machine area. This machine slices open the envelopes which then are opened and the ballots inspected and flattened and scanned in a fenced room. This scanning process uses codes on the surface of the ballots to confirm a voter's ballot has been cast as per a California state contractor database BallotTracker. This data regarding voter name and number is on separate servers in another room. These ballots are then moved across a narrow hallway from the fenced room through a window into the ballot counting and adjudication room where the votes are "read" by HighPro Dominion machines that ARE NOT AND CANNOT be hooked up to the internet per staff insistence. Any damaged ballots or misread ballots (markings in the wrong spot, candidates circled, overvoting for one office, mistakes corrected by voter, write-ins, etc.) are kicked out by the machines and adjudicated in this sealed room by at least two staff per ballot. This includes physically damaged ballots which are then duplicated and scanned to be maintained in the database. Overall counts of votes and areas of votes are available to candidates during the counting, and no ballot counting (of mail in ballots, military ballots, etc.) occurs till voting is closed on November 8. All received ballots remain sealed in their envelopes until that count

begins. No results in toto are released until the vote has been certified; this usually occurs by law < 30 days after the election. Votes are counted in the order received. A repeat tally of 1% of the votes occurs within 5 days of the election as an audit of overall accuracy.

The Master Roster no longer exists physically; previously this was used at each precinct voting site so that the election workers and observers could confirm that no duplicate voting was taking place, and so that "no shows" could be canvassed by candidates to come in to vote, or that questionable votes could be canvassed by candidates. Given that precinct voting no longer occurs, each voting center would have to review and maintain the entire roster of $>505,000$ registered

voters and this is not feasible, thus done by laptop computer at each vote center. This change was forced by the California Voters Choice Act of 2016 and further by the Covid epidemic.

The Voting Roster or Roll of Registered Voters is updated daily based on information from the State database and local notifications of deaths from County Public Health officials. This is a statewide system. If there is a conflict

between state and local data, the data is entered anyway. No localized database is maintained anymore, strictly State database system due to VoteCal law 2018. Those incarcerated who forfeit voting rights are updated from data from the penal code/penal system. However, unless there has been a formal legal judgement regarding a voter's mental incapacity, no record of incapacity is kept or made.

Due to districtbased voting there are now over 200 different versions of the ballot; these are constructed in the ROV center by the Ballot Layout and Proofing

continued on next page

continued from previous page

section of the staff. KNH is the contractor that prints the actual ballots. Around 505,000 ballots are printed in Ventura County each coded to an individual registered voter. The voter is identified only by their signature when they sign the ballot envelope, otherwise by codes on the ballot that are read by the Apex and Opex and Dominion machines. Signatures matching the envelope, ballot, and registered voter are, as noted confirmed by human review.

Besides mail-in ballots to every registered voter, ballots are mailed to military registered voters 45-60 days ahead of the election via military postal

service. These are received and confirmed by the same process as civilian votes. A military member can return vote by mail or by fax. If an active registered voter has a mailing address even outside the state, a ballot is mailed to that address. Remote Access Vote by Mail also exists, the voter fills out ballot on computer then prints out the ballot, signs it, and mails it in. This covers disabled, military, etc. Legally a voter can make their own ballot so long as it is mailed in via the vote by mail envelope.

Provisional ballots are used when a voter presents to a polling place to vote and the live data on the laptops shows that the vote has already been received. These are then adjudicated at the ROV and if indication of fraud in the original or provisional ballot is found, referral to the District Attorney's office for felony prosecution is made. When a voter brings their mail-in ballot to the vote center to use as a guide and requests a ballot, a ballot is printed at that time for the voter and then their mail-in ballot is confiscated and voided.

Drop boxes are heavily physically secured to their sites and are always emptied of contents by a team of two people into a yellow bag which is then locked and transported to the vote center. The drop boxes are locked after collection, and closed down at 8 pm on Election Day. There is no camera security on any of the drop boxes. Ballot harvesting is LEGAL in California thus someone may drop off many ballots at one time at the drop boxes. The security of those ballots remains verification of one ballot per registered

voter and signature verification by human staff.

Mail-in Ballots that are undeliverable due to poor addresses, names, or voters no longer at that address are returned to sender (the ROV). The ROV then sends out 2-3 postcards (?) to confirm the voter is no longer there and then waits 2 election cycles (4 years) before clearing the voter from the rolls. They initially become "inactive" then eventually are moved off roll. On average the ROV processes 500 new voter registrations daily, each taking about 1" to enter.

Data from 2020 election has been preserved and can be requested in various formats.

Hiring for election workers in Ventura County goes through HR process in County; there are Stipend Workers who do not go through this process. Machines are tested/certified by the state of California and are sealed until the election. (Sealed by who, unsealed by who, when, and where are they stored?). When printers of ballots were last certified (KNH company) was unavailable.

OVERALL, the main potential problem in Ventura County MIGHT be in the accuracy of the voter rolls. I personally presented to the appropriate ROV official my adult daughter's latest sample ballot; she has received these and mail-in ballots for the last several elections despite living under her married name in Pennsylvania for almost 20 years and having re-registered there immediately. She has also done all the on-line work to get removed from the local voter rolls several times, and recently was assured by telephone with two different ROV officials that she had been removed from the rolls. Yet she remains an active potential voter in Ventura County. How the voter rolls are handled locally (even though this is a State database it is updated locally) and these, due to time pressures, could not be addressed during our tour. I will continue to research these at the State site and at Venturavote.org and hope for written response from the ROV office, recognizing they are very busy leading up to the November 8 2022 election.

The questions are:

How many "cloned" voters are on the rolls? These are

continued on next page

continued from previous page

multiple registrations of the same voter. How are these detected and eliminated?

How many "inactive voters" are on the rolls, and what constitutes an inactive voter? How and how often are these eliminated from the rolls?

How many "inadequate voter registrations" exist, and how are they handled?

Are the above categories maintained on a database or on separate databases, and can voters on these databases be moved back onto the active voter registration database? By who, and under what circumstances?

What specifics cause a voter registration to be removed from the active voter rolls, and what happens to this registration data?

How are duplicate registrations detected and handled? These include things such as:

- slight variation in name/address
- married vs maiden name
- moved away, moved back
- moved locally
- name swaps

How would we compare vote totals for our county reported by the California Secretary of State in certifying the election with vote totals certified in Ventura County by the County ROV?

The ROV Public Information Officer has received the above list twice and indicates she will try to provide answers, some of which are on the ROV website and the California Secretary of State website. I have not researched those sites.

POSTSCRIPT:

I have sent this to the Public Relations Officer at ROV and received an initial reply that some aspects may be slightly off, but no follow up communications since then, thus accept the above and below with that caveat.

USPS:

I have informally discussed the Postal Service' role in mail-in ballot handling. The ballots/envelopes for this area of California are printed in Seattle WA and placed in a sealed truck, which then drives to the local postal distribution center(s) while being followed by a security car. The seals are broken by a local postal official, and the pallets of votes are checked against the original manifest for accuracy. Ballots are then distributed via routine Postal Service practices, but Federal inspectors come on site at each distribution center for a weekly inspection to assure proper handling and security and that there are NO political signs, symbols, endorsements, etc. of any kind on site. All ballot/envelopes are printed with Return to Sender if undeliverable and those are transferred to the ROV unopened where they are processed as above.

CONCLUSION:

WHILE OUR PERSONAL MONITORING OF THE VOTING CENTERS, THE DROP BOXES, AND THE ROV VOTING CENTER ARE CRUCIAL TO ENSURE ELECTION INTEGRITY, THE CRITICAL LONGTERM ISSUE REMAINS: THE TIMELY ACCURACY OF THE VOTING ROLLS AND ASSURANCE THAT BALLOTS ARE ONLY MADE FOR PROPERLY REGISTERED VOTERS WHO ARE CITIZENS OF THE UNITED STATES. LOCAL OFFICIALS DEPEND ON THE VOTER'S HONOR FOR THE LATTER.
